Krashna Kant Chaurasia

Senior Software Engineer | Cloud-Native Platforms

PROFILE

Senior Software Engineer with 12+ years of experience building cloud-native enterprise platforms across Europe. Hands-on across architecture, backend and frontend implementation, infrastructure as code, CI/CD, and production operations. GCP Professional Cloud Architect and Generative AI Leader certified. Open to Senior Software Engineer, Technical Lead, and Lead Software Engineer roles in Germany and across the EU.

PROFESSIONAL EXPERIENCE

BAUHAUS Deutschland

Aug 2021 - Present | Germany (Hybrid)

Senior Cloud Developer

- Started the enterprise product configurator platform as its sole engineer, defining the architecture and building its initial foundations before two external engineers joined.
- Build and evolve cloud-native services with TypeScript, Node.js, NestJS, React, GCP, Firestore, and Terraform.
- Develop infrastructure as code and CI/CD workflows with GitHub Actions to support repeatable, reliable releases.
- Design APIs and integration patterns while working across engineering, product, UX, and vendor teams.

HSE Home Shopping Europe GmbH

Oct 2019 - Jun 2021 | Germany

Full Stack Web Developer

- Built and maintained e-commerce capabilities for customers across Germany, Austria, and Switzerland.
- Developed backend services and APIs with Kotlin and Spring Boot, alongside customer-facing features in React.
- Worked with event-driven microservices and Docker-based services running on AWS.
- Contributed to checkout, product-presentation, and back-office integrations with product and design.

HARMAN International

Mar 2016 - Sep 2019 | India - Germany

Product Engineer - DevOps Engineer

Key projects: Samsung BIXBY AI | British Telecom IoT | GM NG-NPM

- Built backend services for enterprise clients, including British Telecom IoT, using Java 8 and Spring Boot.
- Developed REST APIs, modular service layers, production integrations, and analytics-reporting implementations.
- Built cloud infrastructure and delivery automation for Samsung BIXBY AI services focused on European markets.
- Provisioned environments with Terraform and Ansible and automated deployments with Spinnaker and Jenkins.
- Implemented logging and monitoring with FluentD, Datadog, and Grafana.

Fiserv

2013 - 2014 | Pune, India

Software Developer

- Developed web application features and REST modules for a global fintech platform using Java, JSP, and Spring MVC.
- Built MVC controllers, service layers, and repository modules from business requirements.
- Contributed to requirement analysis, testing support, and implementation of core banking features.
